Modern and functional
comfortable use all year round

NUUN FABRIC PERGOLA

The **NUUN FABRIC** pergola is a terrace roof with a fabric roof that provides protection from the sun and rain. The key feature is a fabric roof made of durable shade cloth that slides open and closed using a ribbon system controlled by a cord. Its lack of automation ensures reliability and ease of use.

NUUN FABRIC is the ideal solution for those looking for an elegant, easy-to-use fabric pergola that provides comfortable shade and protection from the weather. Thanks to its modularity and extensive customisation options, the NUUN FABRIC pergola is perfectly suited to the needs of both private and commercial users.

■ the best quality

The structure of the NUUN FABRIC pergola is made of extruded aluminium profiles and steel joints. Thanks to the use of the highest quality materials, the pergola is resistant to adverse weather conditions without losing its aesthetics in subsequent seasons of use. Aluminium is a light material, resistant to corrosion and easy to maintain, making aluminium pergolas a popular choice for gardens and terraces.

■ functionality

The NUUN FABRIC pergola provides effective protection from excessive sunlight. The minimalist design and the wide range of colours and fabric choices allow the pergola to match any garden or terrace design. The NUUN FABRIC pergola is an attractive and functional element of garden architecture, creating additional relaxation area.

■ innovation

The aluminium pergola with fabric roof is an innovative solution that combines functionality with modern design. It allows you to regulate the amount of light and shade, provides protection from rain and sun and gives your outdoor space a unique character.

characteristics

- _ free-standing construction
- _ drainage by inclining the fabric bundle on one side of the structure (side of water drainage can be selected)
- _ location of control – choice of control mounted in pergola post

Additional options:

- _ cover for the fabric bundle
- _ covers for the lower plates
- _ possibility of installing zip screen ZIP sunshades

CLEANING AND MAINTENANCE

1. clean the fabric and aluminium profiles of the pergola regularly using a mild detergent and lukewarm water,
2. avoid using aggressive chemicals that may damage the structure,
3. check the condition of the cords and the control mechanism – if you notice any signs of wear, contact the Aliplast Sp. z o.o. complaints department.
