

 **QUADRO**

Adaptation roller shutters is intended for use in existing buildings. The advantage of these products is that they do not require any special pre-installation preparation nor works to the existing structure as they are not integrated with the window. The construction of the systems is made of extruded aluminium that ensures its durability and resistance to abrasion and weathering.

QUADRO

this option is characterized by the special cut-off box that removes the right angle

3 SIZES

the box width and height
 137, 165, 180 mm

ALUMINIUM

The shutter roller is made of aluminum. This ensures structural stability and high product quality. The construction of the roller shutters is made of extruded aluminium that ensures its durability and resistance to abrasion and weathering.

characteristic

installation possibilities

control

manual or automatic

manual: with a with a belt, a crank, or a belt with crank gearing

automatic: by a remote, a key or switch controls

possibility of intelligent roller shutters control

a wall mounting

b installation in a niche

c installation in a recess with inverted box
(curtain rolled inwards)
